A Proactive Approach to Contracting and Law
Helena Haapio (Ed.)
Co-published by the IACCM and Turku University of Applied Sciences

New methods of collaboration and global networked technologies are creating a revolution in business relationships. Falling boundaries and the increasing need to cross the ‘borders’ created by different legal systems are leading to growing calls for a fresh approach to contracting and law. These changes increase uncertainty and demand a reliable basis for the definition and performance of business relationships.

That is where the proactive approach comes in. It offers an approach and a method focused on success, directed at prevention rather than cure. In this book, the reader will find many ideas, contributions and results developed from those presented at the Conference on Commercial Contracting for Strategic Advantage: Potentials and Prospects held in Turku, Finland, June 13–16, 2007. The book gives an introduction and insights into a proactive approach to the law, to the management of relationships, projects, contracts, and risks and to the prevention of legal uncertainties and disputes. It illustrates the need, outlines the benefits and provides some early and practical answers to how things must change.
